Training hoof care specialists for the 21st century

22290VIC Diploma of Equine Podiotherapy

The Australian College of Equine Podiotherapy is a private college dedicated to the ongoing education of professional equine hoof therapists.

It has partnered with the Registered Training Organisation known as Alexandra Community Hub (RTO 3730) to deliver the **Nationally Accredited** 22290VIC Diploma of Equine Podiotherapy. This exclusive course is the only accredited Diploma of its kind in Australia and delivers a stand alone modality of functional equine hoof care.

This course aims to produce diploma level graduates who can effectively deal with all of the diverse and evolving scenarios that arise when they are working as equine hoofcare professionals, from the everyday task of helping to grow and maintain optimum hooves to the specialised skills of rehabilitating lame horses.

Such capability is made possible partly through the development of foundation knowledge of functional anatomy, morphology, physiological processes and biomechanics, and partly by learning how to apply this information in a hugely variable workplace.

The course is delivered by industry leaders who have long term experience, yet remain as current industry participants and know what hoofcare parameters and management strategies work.

From hoof science to sustainable hoof protection to workplace safety and running a small business, the 22290VIC Diploma of Equine Podiotherapy is the complete hoofcare package.

Graduates of the college are highly regarded in the equine industry and due to the ever-increasing demand for their professional services, they are able to quickly repay their investment in this course.

How long is the Diploma Course?

Equine hoofcare is a huge field of study which requires a substantial course.

This diploma totals 2000 hours (including both internal and external studies) and is designed to be completed in two years. In the first year the course is delivered in 3 intensive 7 day blocks of face to face lectures and practicals complemented by distance learning modules. In the second year there is a fourth block of 7 days which includes a practical exam.
